

Final Examination, August 31st, 2015

4y/6y ED

1. upper lip (orbicularis oris m.)
2. ascending aorta
3. R optic nerve
4. L transverse sinus
5. L radius
6. head of L humerus
7. R auricle
8. pulmonary trunk
9. thyroid cartilage
10. thyroid gland (L lobe)
11. L carotid canal
12. occipital bone
13. R eyeball
14. epiglottis
15. greater omentum
16. L femoral artery
17. L gluteus maximus m.
18. L sciatic nerve
19. R kidney
20. gall bladder (body)

21. R ureter (abdominal part)
22. R sacroiliac joint
23. shaft/body of L fibula
24. aortic arch
25. L maxillary sinus
26. lens of L eyeball
27. splenium of corpus callosum
28. interthalamic adhesion
29. pancreatic duct (main)
30. L suprarenal vein

31. cystic duct
32. cardia of stomach/cardiac notch
33. body of sternum
34. oesophagus
35. L superior lobar bronchus
36. anterior cusp of pulmonary valve
37. L atlantooccipital joint
38. R vertebral artery
39. anterior longitudinal lig. (of vertebral column)
40. L vestibular bulb
41. intermediate tendon of R digastric m.
42. R suprascapular nerve
43. falciform lig. of liver
44. tendinous intersection of L rectus abdominis m.
45. L saphenous nerve
46. fibrous capsule of L kidney
47. L long thoracic nerve
48. lig. arteriosum
49. longitudinal cerebral fissure
50. R thalamus
51. tendon of R tibialis anterior m.
52. R anterior grey horn
53. L deep palmar arch
54. L abductor pollicis brevis (L thenar – 1 p.)
55. L orbicularis oculi m. (orbital part)
56. L inferior labial artery
57. anterior interventricular branch of left coronary artery
58. zygomatic branch of L facial nerve
59. lesser/minor calyx of R kidney
60. epiploic appendix (of sigmoid colon)
