

Practical examination, June 12th, 2013

1. left carotid canal
2. external occipital protuberance
3. septum pellucidum
4. left thalamus
5. left insula
6. left parietal lobe
7. left main (principal) bronchus
8. esophagus (thoracic part)
9. right brachiocephalic vein
10. transverse colon
11. cecum
12. pancreas
13. dens of axis
14. soft palate
15. right renal artery
16. prostate
17. left ulnar nerve
18. left sciatic nerve
19. pulmonary trunk
20. left common carotid artery
21. posterior (dorsal) ramus branch of spinal nerve T6
22. (6th) left posterior intercostal artery
23. central canal of spinal cord
24. confluens of sinuses
25. abdominal part of right ureter
26. left minor calix
27. left sacrotuberous ligament
28. right piriformis muscle
29. right auriculotemporal nerve
30. right teres minor

31. left bulbospongiosus
32. left obturator membrane
33. left superficial palmar arch
34. palmar branch of right ulnar nerve
35. left posterior crico-arytenoid muscle
36. rima glottidis
37. posterior interventricular branch of right coronary artery
38. isthmus of thyroid gland
39. root of right hypoglossal nerve
40. right mandibular foramen (canal)
41. right long thoracic nerve
42. hepatogastric ligament (lesser omentum)
43. right lateral femoral cutaneous nerve (lateral cutaneous nerve of the thigh)
44. right genitofemoral nerve
45. right superior rectus muscle of the eye
46. cerebellar falx
47. pectinate muscle of right atrium
48. body of right epididymis
49. right common iliac artery
50. left greater trochanter
51. left lunate bone
52. right capitate bone
- 53.. right coraco-acromial ligament
54. right trapezoid ligament (coracoclavicular ligament)
55. right pedicle of arch of thoracic vertebra
56. thyrohyoid membrane
57. longitudinal fold of duodenum
58. left tensor fasciae latae
59. right nipple
60. superior trunk of right brachial plexus
