

Practical Admission Test May 28th, 2013

1. right mental foramen
2. left foramen spinosum
3. anterior longitudinal ligament
4. left acetabular fossa (acetabulum – 1p)
5. intervertebral disc C6-C7
6. right proximal radioulnar joint
7. right olfactory tract
8. left inferior colliculus of tectum mesencephali
9. central canal of spinal cord (spinal cord – 1p)
10. left middle nasal concha
11. tendon of left semitendinosus
12. right longissimus thoracis
13. splenium of corpus callosum
14. left putamen (lentiform nucleus – 1p)
15. right thalamus
16. fourth ventricle
17. right abductor pollicis longus
18. right axillary nerve
19. right auricle
20. left vagus nerve
21. right renal pelvis
22. right greater trochanter
23. breast
24. esophagus
25. genioglossus
26. right torus tubarius
27. left dorsal nerve of penis
28. (common) bile duct
29. tuberosity of left navicular bone (navicular bone -1p)
30. right costal process of L3

31. thyrohyoid membrane
32. left cricothyroid muscle
33. left main bronchus
34. apex of left lung
35. inferior vena cava
36. descending colon
37. median glosso-epiglottic fold
38. carina of trachea (tracheal bifurcation – 1p)
39. right spinal ganglion (dorsal root ganglion)
40. left vertebral artery
41. left ovary
42. left mesosalpinx
43. muscular part of interventricular septum
44. septal leaflet of tricuspid valve
45. right umbilical artery
46. left gastric artery
47. right piriformis
48. right plantaris muscle
49. right palmaris longus
50. left levator scapulae
